EDUCATION / CERTIFICATES

Science Co-op / Computer Science Major @ University of British Columbia Sept. 2025 - Expected Graduation in 2029

Dean's List | GPA: 3.75 | Relevant coursework: Computer Graphics, DSA, OOP, Software Development, Software Engineering

Amazon Professional Junior Software Development Certificate

Expected Sep. 2026

- Building full-stack development skills across the SDLC by applying OOP, SQL database management, and TDD

Google AI Professional Certificate

Expected Sep. 2026

- Building AI-assisted application workflows through structured prompt engineering, data analysis, and data wrangling.

Vertex School / AI Game Development BootCamp

Sept. 2026 - Expected Nov. 2026

TECHNICAL PROJECTS

My Personal Website / [My Website](#) / TypeScript / React / HTML / CSS / JavaScript

- Built a portfolio with reusable project data, category filtering, CSS theming, and a custom YouTube API music player.

Zoo Managing Game / Github: [Zoo Manager](#) / Java / Swing / JUnit / JSON

- Built a zoo-management simulation game supporting 12+ core systems by designing an OOP entity model with Singleton-based event logging, shared across a Swing GUI and console client.
- Enabled persistent save/load game state by implementing custom JSON serialization across the simulation's entity and economy, and verified state transitions with 73 JUnit unit tests.

Vyxxen Prototype / Github: [Vyxxen](#) / Three.js / JavaScript / WebGL / Agentic Development

- Orchestrated an agentic prototyping workflow, converting 40 structured design decisions across five requirement rounds into a detailed design markdown file specification before code generation.
- Directed an AI coding agent to turn the specification into a workable Three.js browser featuring isometric flight and combat.

Pawn Escape / Itch.io: [Pawn Escape](#) / Github: [Pawn Escape](#) / GMTK Game Jam - 10,500+ entries / Unity / C#

- Implemented a turn-based tactics engine supporting players, enemies, pickups, and cooldowns by combining BFS movement, an FSM-driven turn system, and multi-system undo/rewind.
- Reduced tile collision lookups to O(1) by layering dictionary-backed occupancy queries over Unity's Tilemap API.
- Eliminated per-frame UI polling by building an event-driven card-hand interface with runtime layout scaling.

Lumi the Forgotten Moon / Github: [Lumi-and-the-Forgotten-Moon](#) / Unity / C# / Clip Studio Paint Pro

- Decoupled movement, input, and state logic into focused components by applying the Single Responsibility Principle to the gameplay architecture. Also improved input responsiveness across movement states by implementing an FSM controller with queue-based input buffering.

TECHNICAL SKILLS

Programming Languages / Framework: C#, C++, Java, C, TypeScript, SQL

Web / Frameworks: React, Node.js, HTML, CSS, Three.js

Software Engineering: OOP, Data Structures and Algorithms, Test-Driven Development, SDLC, FSMs, Design Patterns

AI / Data Workflows: AI-Assisted Development, Prompt Engineering, Data Analysis, Data Wrangling, LLM

Developer Tools: GitHub, Git

EXPERIENCE

AllSet Learning / Math, English Tutor

October 2025 - Present

- Earned management recognition as a top-performing mathematics tutor by tutoring students and communicating detailed progress and learning needs.

Alphaville American Private School / Teaching Assistant, Computer Formatting

July 2022 - July 2023

- Supported school operations by formatting assignments, exams, report cards, and other Microsoft Word documents and preparing principal-facing classroom reports.
