ANGUS CHOU

(778) 668-0388 | tsuki9355@gmail.com | Portfolio | GitHub | LinkedIn

EDUCATION

Science Co-op | Computer Science Major @ University of British Columbia **Sept. 2025 - Expected Graduation in 2028**
Dean's List | GPA: 3.8 | Coursework: Data Structures & Algorithms, OOP, Software Engineering, Software Development

TECHNICAL SKILLS

Languages: Java, C++/C, C#, JavaScript, TypeScript, Verse
Frameworks & Tools: JUnit, Swing, React, Three.js, Unity, Unreal Engine 5, UEFN, WebGL, Git, GitHub, JSON
Engineering: OOP, DSA, unit testing, event-driven systems, finite-state machines, AI-assisted development, SQL

TECHNICAL PROJECTS

Zoo Manager | *Java, Swing, JUnit, JSON* | **GitHub**

- Built a zoo-management simulation game supporting 12+ core systems by designing an **OOP entity model** with Singleton-based event logging, shared across a **Swing GUI** and console client.
- Implemented custom JSON save/load for persistent simulation and economy state.
- Validated state transitions by designing **73 JUnit tests.**

Vyxxen | *Unreal Engine 5, C++* | **GitHub**

- Developed a Zaxxon-inspired game in Unreal Engine 5 as part of Vertex School's Game Development Boot Camp.
- Building familiarity with Unreal Engine's C++ gameplay framework, including custom classes, inheritance, composition, interfaces, and modular Actor Components to support reusable gameplay systems.

Vyxxen Prototype | *Three.js, JavaScript, WebGL, Agentic Development* | **GitHub**

- Orchestrated an agentic prototyping workflow, converting **40 structured design decisions** across five requirement rounds into a structured Markdown design specification before code generation.
- Directed an AI coding agent to turn the specification into a workable Three.js browser game.

Pawn Escape | *Unity, C#* | **Play** | **GitHub**

- Built a turn-based game integrating BFS movement, FSM-driven turn system, and multi-system undo/rewind.
- Achieved **O(1)** tile occupancy lookups using dictionary-backed queries
- Replaced per-frame UI polling by designing an event-driven card interface.

CERTIFICATIONS & ADDITIONAL TRAINING

Amazon Software Development Certificate | Certificate **Oct 2026**

- Studying software development practices across **SDLC** by applying OOP, **SQL/JDBC**, TDD, Spring Boot, REST APIs, **AWS** cloud deployment

Vertex School | AI Game Development Boot Camp **Sept. 2026 - Nov. 2026**

- Developed 2 playable games using Unreal Engine 5 and C++, focusing on gameplay systems, modular architecture, and multiplayer functionality.
- Applying C++ object oriented programming concepts, including classes, inheritance, composition, interfaces, and reusable actor components, to structure gameplay logic.

EXPERIENCE

UBC Game Development Club | Main Programmer **September 2026 - Present**

- Collaboring with teammates as main programmer to design and implement gameplay systems for the UBC 2026 Winter game project.

AllSet Learning | Math, English Tutor **October 2025 - Present**

- Earned management recognition as a top-performing mathematics tutor by tutoring students and communicating detailed progress and learning needs.

Alphaville American Private School | Teaching Assistant, File Manager **July 2022 - July 2023**

- Supported school operations by formatting assignments, exams, report cards, and other Microsoft Word documents and preparing principal-facing classroom reports.
