EDUCATION / CERTIFICATES

Computer Science Major @ University of British Columbia

Expected Graduation in 2029

GPA: 3.75; Dean's List | relevant coursework : **DSA, OOP, Software Development, Software Engineering**

Amazon Professional Junior Software Development Certificate

Expected Sep. 2026

- **Full-Stack** application development utilizing **Object-Oriented Programming** (OOP), **SQL** database management, **Test Driven Development** (TDD) across the **Software Development Life Cycle** (SDLC)

Google AI Professional Certificate

Expected Sep. 2026

- **AI-assisted application** development, **structured prompt engineering** and advanced **data analysis** and **wrangling** workflows.

TECHNICAL PROJECTS

Pawn Escape / [Pawn Escape](#) / GMTK 2026 Game Jam - **10,500+** entries / **Unity** / **C#**

- Solo-developed a puzzle-platformer in **96 hours** around the theme "Countdown," with a countdown-based core loop.
- Built a **turn-based tactic engine** in **Unity/C#** with **BFS** movement, a **state-machine** driven turn system, and multi-system undo/rewind supporting player, enemies, pickups, and cooldowns.
- Built an index layer over **Unity's tilemap API** using **dictionary** backed occupancy queries, enabling **O(1)** collision.
- Built an **event driven UI** for a dynamic card-hand system with runtime layout scaling, avoiding per-frame polling.

Lumi the Forgotten Moon / [Lumi-and-the-Forgotten-Moon](#) / **Unity** / **C#** / **Clip Studio Paint Pro** / **Blender**

- Built a **finite-state machine** player controller to manage different movement states and transitions, with a **Queue based input buffering system** for more responsive controls.
- Structured gameplay system around the **Single Responsibility Principle**, separating player movement, input handling, state logic, and other behaviors into focused components.

My Personal Website / [My Website](#) / **TypeScript** / **React** / **HTML** / **CSS**

- Built a **component driven** portfolio site in **React** and **TypeScript** with a token based **CSS** theming system, **typed data models** and **category filtered** project view.

Guess the Weight / [Guess The Weight](#) / Kenney Jam 2026 - **600** entries / **Unity** / **C#**

- Solo-developed a physics-based puzzle game around the theme "SCALE" in **48 hours**, using exclusively Kenney's assets.
- Built a **physics simulated balance-scale game** in **Unity** with a **data driven level pipeline**, **event driven items/ UI system**, and a **custom editor tool**.

TECHNICAL SKILLS

Languages / Framework: C#, C++, Java, C, TypeScript, React, Node, CSS

Game Development: Unity, Unity Physics, Tilemaps, Editor Tooling, Blender

Programming: OOP, DSA, FSMs, Pathfinding, Design Patterns

EXPERIENCE

AllSet Learning / **Math, English Tutor**

October 2025 - Present

- Recognized by management as **top-performing** mathematics tutor.
- Tutors Grade 7 students in Mathematics and English, adapting lessons to individual needs and current school work.
- Communicate detailed progress updates and learning needs to management.

Alphaville American Private School / **Teaching Assistant, Computer Formatting**

July 2023 - July 2024

- Supported students and faculty with classroom and administrative tasks.
- Formatted assignments, exams, report cards and other **Microsoft Word documents**.
- Prepared detailed reports for the Principal on classroom activities and teaching practices.
