EDUCATION / CERTIFICATES

Computer Science Major @ University of British Columbia **Sept. 2025 - Expected Graduation in 2029**
GPA: 3.75; Dean's List | relevant coursework : **DSA, OOP, Software Development, Software Engineering**

Amazon Professional Junior Software Development Certificate **Expected Sep. 2026**

- Building a full-stack development skills across the **SDLC** by applying **OOP, SQL database management, and TDD**

Google AI Professional Certificate **Expected Sep. 2026**

- Building AI-assisted application workflows through **structured prompt engineering, data analysis and data wrangling.**

Vertex School | AI Game Development BootCamp **Sept. 2026 - Expected Nov. 2026**

TECHNICAL PROJECTS

My Personal Website | [My Website](#) | **TypeScript** | **React** | **HTML** | **CSS**

- Centralized reusable UI and project data by building a component-driven React/TypeScript portfolio with typed models, token-based CSS theming, and category filtering.
- Integrated in-page media playback by building a **custom hand-drawn music player** on the **Youtube IFrame API**.

Pawn Escape | Itch.io: [Pawn_Escape](#) | Github: [Pawn_Escape](#) | GMTK Game Jam - **10,500+** entries | **Unity** | **C#**

- Implemented a **turn-based tactics engine** supporting player, enemies, pickups, and cooldowns by combining **BFS movement, an FSM-driven turn system, and multi-system undo/rewind.**
- Reduced tile collision lookups to **O(1)** by layering **dictionary-backed occupancy queries** over Unity's Tilemap API.
- Eliminated per-frame UI polling by building an **event-driven card-hand interface** with runtime layout scaling.
- Validated complex state transitions and edge cases with **structured playtesting** in the absence of an automated test suite

Guess the Weight | Itch.io: [Guess The Weight](#) | Github: [Guess the Weight](#) | Kenney Jam - **600+** entries | **Unity** | **C#**

- Delivered a complete physics-based puzzle game in **48 hours** for a **600+ entry game jam** by solo developing around the "SCALE" theme with Kenney assets.
- Improved content authoring and system separation by building a **data-driven level pipeline, event-driven UI item / UI architecture, physics simulation, and custom editor tool.**

Lumi the Forgotten Moon | Github: [Lumi-and-the-Forgotten-Moon](#) | **Unity** | **C#** | **Clip Studio Paint Pro**

- Decoupled movement, input, and state logic into focused components by applying the **Single Responsibility Principle** to the gameplay architecture.
- Improved input responsiveness across movement states by implementing an **FSM controller with queue-based input buffering,**

TECHNICAL SKILLS

Programming Languages / Framework: C#, C++, Java, C, TypeScript, SQL

Web / Frameworks: React, Node.js, HTML, CSS

Software Engineering: OOp, DSA, TDD, SDLC, FSMs, Design Patterns

AI / Data Workflows: AI-Assisted Development, Prompt Engineering, Data Analysis, Data Wrangling

Developer Tools: GitHub, Git

EXPERIENCE

AllSet Learning | Math, English Tutor **October 2025 - Present**

- Earned management recognition as a top-performing mathematics tutor by tutoring students and communicating detailed progress and learning needs.

Alphaville American Private School | Teaching Assistant, Computer Formatting **July 2023 - July 2024**

- Supported school operations by formatting assignments, exams, report cards, and other Microsoft Word documents and preparing principal-facing classroom reports.
