ANGUS CHOU

(778) 668-0388 | tsuki9355@gmail.com | Portfolio | GitHub | LinkedIn

EDUCATION

Science Co-op | Computer Science Major @ University of British Columbia **Sept. 2025 - Expected Graduation in 2028**
Dean's List | GPA: 3.8 | Coursework: Data Structures & Algorithms, OOP, Software Engineering, Software Development

TECHNICAL SKILLS

Languages: C++, C#, Java
Game Engines & Tools: Unreal Engine 5, Unity, Visual Studio, Git, GitHub
Gameplay & Core concepts: OOP, STL, DSA, BFS, FSM, event-driven systems, inheritance, composition

TECHNICAL PROJECTS

Mini Dungeon Adventure | *C++, STL, Visual Studio, Git* | **GitHub**

- Developed a turn-based dungeon crawler in C++ using inheritance and enum-driven item effects.
- Implemented level-scaled enemy encounters using weighted random selection and progression-based monster eligibility.
- Used STL containers and algorithms (std::map, std::find_if, std::sort) for inventory management, item lookups, and persistent leaderboard rankings.

Vyxxen | *Unreal Engine 5, C++* | **GitHub**

- Developed a Zaxxon-inspired game in Unreal Engine 5 as part of Vertex School's Game Development Boot Camp.
- Exploring Unreal's Gameplay Ability System (GAS), delegates, event-driven architecture, and UObject lifecycle management to support scalable gameplay mechanics.
- Building familiarity with Unreal Engine's C++ gameplay framework, including custom classes, inheritance, composition, interfaces, and modular Actor Components to support reusable gameplay systems.

Pawn Escape | *Unity, C#* | **Play** | **GitHub**

- Built a turn-based game integrating BFS movement, FSM-driven turn system, and multi-system undo/rewind.
- Achieved O(1) tile occupancy lookups using dictionary-backed queries
- Replaced per-frame UI polling by designing an event-driven card interface.

CERTIFICATIONS & ADDITIONAL TRAINING

Vertex School | AI Game Development Boot Camp **Sept. 2026 - Nov. 2026**

- Developed 2 playable games using Unreal Engine 5 and C++, focusing on gameplay systems, modular architecture, and multiplayer functionality.
- Applying C++ object oriented programming concepts, including classes, inheritance, composition, interfaces, and reusable actor components, to structure gameplay logic.
- Exploring event-driven gameplay systems, delegates, UI/HUD state management, and AI-assisted development workflows with an emphasis on maintainable, reusable code.

Amazon Software Development Certificate | Certificate **Oct 2026**

- Studying software development practices across SDLC by applying OOP, SQL/JDBC, TDD, Spring Boot, REST APIs, AWS cloud deployment

EXPERIENCE

UBC Game Development Club | Main Programmer **September 2026 - Present**

- Collaborating with teammates as main programmer to design and implement gameplay systems for the UBC 2026 Winter game project.

AllSet Learning | Math, English Tutor **October 2025 - Present**

- Earned management recognition as a top-performing mathematics tutor by tutoring students and communicating detailed progress and learning needs.

Alphaville American Private School | Teaching Assistant, File Manager **July 2022 - July 2023**

- Supported school operations by formatting assignments, exams, report cards, and other Microsoft Word documents and preparing principal-facing classroom reports.
